

Board Policy

Input in Decision Making

**Philosophy
Policy 1005**

Policy Statement

The Board shall make active efforts to solicit input from citizens of the district, staff members, and students and shall give consideration to that input in its decision making.

Input may be received through recognized channels such as Board advisory committees, school organizations, and meetings designed to seek input, as well as through the public's right to address the Board.

The Board shall consider such input in making decisions, however, the Board remains the final decision-making authority.

Responsibility

The Board leadership and the Superintendent shall ensure that advisory committees required by law are appointed and that other opportunities for input are available.
