EZ see Keyboard- Letter keys are color-coded by row with number keypad being a different color. Keys that are not being used can be easily removed. There is no software to install- just plug into a USB port and you are ready to go. Keyboard separator and stand are also available.

Visual Edge Slant Board- This slant board holds reading material at the optimal reading angle of 22 degrees. Book “catch” at the bottom is removable for unobstructed writing. The board surface also serves as a dry erase board (markers not included) and a magnetic board.

Double-Sided Magnetic Letters- These large letters (about 3-inch square) have *lower case* letters on one side with a clear, colorful photo on the reverse side.

Buzz and Beep Digital Timer- This is a very simple timer to use. Can be easily set to beep and vibrate and will beep and vibrate for a *full 30 seconds* and then every 10 seconds thereafter for a maximum of 10 minutes unless the STOP button is pressed. Great for students who don't easily recognize a single beep timer! Can stand up on a desk or be clipped to a belt.

Please contact Pat at pat.hammond@redclay.k12.de.us if you'd like to try out any of these items.
